

Tankstore (Singapore)

Date Completed: July 2014

Number of Tanks: Eighteen (18)

Capacity: 30,000 m³ ~ 60,000 m³

Product Type: Fuel Oil blending

The facility is located at Pulau Busing, the southern island of Singapore; a choice location, for it lies strategically in the hub of the world's busiest shipping regions.

Since its commissioning in December 1990, continuous expansion of the terminal has been carried out. Premier 6 was approached by Tankstore to provide Pulse Air Mixing system for 18 numbers of storage tank in fuel oil blending, one of the largest system provision since 1992.

06 Main controller, close to 700 accumulation plates, 250 power valves, approximate 18.0 kilometre run of pipes (by Rotary) were provided in a short 4 months duration.

All technical aspects with regards to scope of work were outlined and documented to ensure safety, functionality and proper execution of the entire project.
